IN THE SUPREME COURT OF THE STATE OF KANSAS

Administrative Order No. 90

Re: Kansas Child Support Guidelines

The attached Kansas Child Support Guidelines are hereby adopted, and are to be used as a basis for establishing and reviewing child support orders in the district courts of Kansas, effective August 1, 1994.

Administrative Order No. 83 (1993 Kan. Ct. R. Annot. 71 et seq.), adopted and effective on February 6, 1992, promulgating Kansas Child Support Guidelines, is superseded by this order.

BY THE ORDER OF THE COURT this 6th day of May, 1994.

RICHARD W. HOLMES, Chief Justice

Administrative Order No. 90 Re: 1994 KANSAS CHILD SUPPORT GUIDELINES

I. USE OF THE GUIDELINES

The Kansas Child Support Guidelines are the basis for establishing and reviewing child support orders in the district courts in Kansas, including cases settled by agreement of the parties. Judges and hearing officers must follow the guidelines. The Net Parental Child Support Obligation is calculated by completing a Child Support Worksheet (Appendix I).

The Court shall consider all relevant evidence presented in setting an amount of child support, including but not limited to the Child Support Adjustments set forth in Section E of the worksheet. The calculation of the respective parental child support obligations on Line D.9. of the worksheet is a rebuttable presumption of a reasonable child support order. However, the Court shall complete Section E of the Child Support Worksheet listing all relevant Child Support Adjustments. The Child Support Adjustments shall constitute the written criteria for deviating from the rebuttable presumption. If the Court finds, in the best interests of the child, that the amount of child support as calculated on Line D.9. of the worksheet to be unjust or inappropriate in a particular case, the Court shall apply the Child Support Adjustments to modify the child support amount.

The Court, in using Child Support Adjustments to modify the child support amount, shall use Section E of the worksheet to make written findings or specific findings on the record, which shall be included in the journal entry, as to the reasons for any deviation from the Net Parental Child Support Obligation on Line D.9.

Pursuant to 45 CFR 302.56 (1993), the findings that rebut the guidelines shall state the amount of support that would have been required, how the order varies from the guidelines, including the value of any property or other support awarded in lieu of support presumed by the guidelines, the justification of how the findings serve the best interests

of the child, and in cases where items of value are conveyed in lieu of a portion of the support presumed under the guidelines, the estimated value of items conveyed. Use of Section E of the worksheet shall constitute sufficient written findings to comply with this requirement.

II. DEFINITIONS AND EXPLANATION

A. Child Support

The purpose of child support is to provide for the needs of the child. The needs of the child are not limited to direct needs for food, clothing, school, and entertainment. The child support is also to be used to provide for housing, utilities, transportation, and other indirect expenses related to the day-to-day care and well-being of the child.

B. Child Support Worksheet

The worksheet **should** contains the actual calculation of the child support based on the Child Support Income, Work-Related Day Child Care Costs, Health and Dental Insurance Premiums, and any Child Support Adjustments. (See Section V., Specific Instructions for the Worksheet and Appendix V for an example.)

C. <u>Child Support Schedules</u>

The Child Support Schedules (Appendix II) are charts that were developed by the Child Support Guidelines Advisory Committee. The schedules are based upon national data regarding average family expenditures for children, which vary depending upon three major factors: the parents' combined income, the number of children in the family, and the ages of the children. The schedules are derived from an economic model initially developed by Dr. William Terrell in 1987, updated in the fall of 1989 by Dr. Ann Coulson using more current data, and modified downward at lower income levels in 1990 at the Court's request, and adjusted for current economic data in 1993.

The national data upon which the schedules are based take into consideration that income deductions for social security, federal retirement, and federal and state income taxes, as well as property taxes on owner-occupied housing, are not available to the family for spending. Thus, although the charts use combined gross monthly income as one factor in determining child support, the entries in the schedules used to calculate the actual child support obligation are based upon after-tax income. The schedules also assume a reduction in average expenditures per child, particularly at lower combined income levels, because of the financial impact on the family of maintaining two households instead of one after the dissolution of the family unit. 67

D. <u>Domestic Gross Income--Wage Earner</u>

The Domestic Gross Income for the wage earner is income from all sources, excluding public assistance. In determining Domestic Gross Income, it may be necessary for the Court to consider historical information and the seasonal nature of employment. For example, if overtime is regularly earned by one of the parties, then an historical average of one year should be considered.

Other income, besides wages of the individual, includes all income which is regularly and periodically received from any source. (See Section V., Specific Instructions for the Worksheet subsection B. and Appendix V for an example.)

E <u>Imputed Income</u>

- 1. Income may be imputed to the noncustodial parent in appropriate circumstances including the following:
 - a. Absent substantial justification, it should be assumed that a parent is able to earn at least the federal minimum wage and to work 40 hours per week.
 - b. When a parent is deliberately unemployed, although

capable of working full time, employment potential and probable earnings may be based on the parent's recent work history, occupational skills, and the prevailing job opportunities in the community.

- c. When a parent receives significant in-kind payments that reduce personal living expenses as a result of employment, such as a company car, free housing, or reimbursed meals, the value of such reimbursement should be added to gross income.
- d. When there is evidence that a parent is deliberately underemployed for the purpose of avoiding child support, the Court may evaluate the circumstances to determine whether actual or potential earnings should be used.
- 2. Income may be imputed to the custodial parent in appropriate circumstances, but should not result in a higher support obligation for the noncustodial parent.

F. <u>Self-Employment Gross Income</u>

The Self-Employment Gross Income is income from self-employment and all other sources.

Other income includes all other income besides self-employment of an individual which is regularly and periodically received from any source.

G Reasonable Business Expense

In cases of self-employed persons, Reasonable Business Expenses shall be those actual expenditures reasonably necessary for the production of income. Depreciation shall be included only if it is shown that it is reasonably necessary for production of income. Reasonable business expenses shall include the additional self-employment tax paid over and above the FICA rate.

H. <u>Domestic Gross Income--Self-Employed</u>

Domestic Gross Income for self-employed persons is self-employment gross income less Reasonable Business Expenses.

I. Cost of Living Differential

The cost of living may vary among states. The <u>ACCRA</u>

<u>Cost of Living Index</u> provides relative costs of living throughout the United States.

H.J. Child Support Income

Child Support Income is the Domestic Gross Income after adjustments for child support paid in other cases and for maintenance paid and or received in this and the present or other cases. (See Section V., Specific Instructions for the Worksheet, subsection C. and Appendix V for an example.)

J.K. Child Support Adjustments

Child Support Adjustments are considerations of additions or subtractions from the Net Parental Child Support Obligation to be made in the best interests of the child. (See Section V., Specific Instructions for the Worksheet, subsection E.)

K.L. Multiple-Family Adjustment

The Multiple-Family Adjustment is used to adjust the noncustodial parent's child support obligation when the noncustodial parent has legal financial responsibility for the support of other children who reside with the noncustodial parent in addition to besides the children shared with the custodial parent. (See Section IV., General Instructions for Preparing the Worksheet, subsection F. and Section V., Specific Instructions for the Worksheet, subsection D.3.)

⊞M. Shared Custody

Shared custody is the regular sharing of residential custody on an equal or nearly equal amount of the child's time. To qualify for shared custody treatment, blocks of time must be regular and equal or nearly equal rather than equal based on a noncustodial extended visitation basis (i.e. summer visitation, holidays, etc.), in which an adjustment pursuant to subsection E.2. of the Worksheet may be applicable. (See Section IV, General Instructions for preparing the Worksheet, subsection G.)

N. <u>Divided Custody</u>

Divided custody is when parents have two or more children and each parent has residential custody of one or more of the children. (See Section IV., General Instructions for preparing the Worksheet, subsection E. and Section V., Specific Instructions for the Worksheet, subsection D.3.)

III. DOCUMENTATION

The A completed worksheet, together with a completed Domestic Relations Affidavit (Appendix III), shall be presented to the Court by the party requesting a child support order or modification.

Information provided by the parties pursuant to the Domestic Relations Affidavit shall assist the Court in confirming or adjusting the various amounts entered on the worksheet. The information required shall be attached to the application for support or motion to modify support.

The worksheet approved by the Court shall be filed in every case where an order of child support is entered after the effective date of these guidelines.

IV. GENERAL INSTRUCTIONS FOR PREPARING THE WORKSHEET

A. Rounding

Calculations should be rounded to the nearest tenth for percentages.

Calculations should be rounded to the nearest dollar in all instances.

In using the Child Support Schedules, it may be necessary to round to the nearest basic child support obligation amounts for income amounts not shown.

B. Age

In determining the age of a child, age on the child's nearest birthdate shall be used.

C. Income Beyond the Child Support Schedule

If the Combined Child Support Income exceeds the highest amount shown on the schedules, the Court should exercise its discretion by considering what amount of child support should be set in addition to the highest amount on the Child Support Schedule. For the convenience of the parties, a formula is contained at the end of each child support schedule to compute the amount that is not set forth on the schedules.

Instructions for calculating the child support formulae for one child, age 16-18, at higher income levels:

In order to calculate the formulae, a calculator with an exponential key is needed. The exponential key will be marked y^x . The exponential key raises y to the power of x.

For example, the formula for a one child family is:

Income 0.697739 X 2.341021

If monthly income is \$12,000, enter the following on the calculator:

Step 1 - Enter "12000"

Step 2 - Hit the "yx" key

Step 3 - Enter ".697739"

Step 4 - Hit the multiplication key "X"

Step 5 - Enter "2.341021"

Step 6 - Hit the equal key "="

Step 7 - The calculated amount is \$1,643

If the child is younger than 16-18:

Step 8: If the child is 7-15, multiply \$1,643 by 0.87, or If the child is 0-6, multiply \$1,643 by 0.75

This calculation is a per child calculation. Therefore, the amounts for each child should be added together to arrive at the total child support amount pursuant to section V.D.3.

D. More than Six Children

If the parties share legal responsibility for more than six children, support should be based upon the established needs of the children and be greater than the amount of child support on the Six Child Families Schedule.

D.E. Application in Divided Custody Situations

For Divided Custody, if each parent has residential custody of one or more children, a worksheet should be prepared for each family unit using the Child Support Schedule which corresponds with the total number of children of the parties—to—the—litigation—living in each the family units. If the parties' children are covered by the same health insurance policy, the cost should be prorated based upon the number of children in each family unit. Upon completion of the two worksheets, the lower Net Parental Child Support Obligation is subtracted from the higher amount. The difference is the amount of child support the party having the higher obligation will pay to the party with the lower obligation. (See paragraph II.N. for a definition and Section V., Specific Instructions for the Worksheet, subsection D.3.)

EF. Application of the Multiple Family Adjustment

The Multiple Family Adjustment may only be used by a noncustodial parent when an increase in support is sought by the custodial parent. If the utilization of the Multiple Family Adjustment will result in a basic child support obligation (Line D.3.) which is below the poverty level as shown on the applicable Child Support Schedule, the Multiple Family Adjustment shall not be used.

For the Multiple-Family Adjustment, if the noncustodial parent has children by another relationship who reside with him/her, the Child Support Schedule representing the total number of children that the noncustodial parent legally is obligated to support shall be used in determining the basic support obligation. (See paragraph II.L. for a definition and Section V., Specific Instructions for the Worksheet, subsection D.3.)

In the instance of shared custody or divided custody, the Multiple Family Adjustment is available to either party in defense of a requested child support increase.

F.G. Application in Shared Custody Situations

For Shared Custody, the support is calculated using one worksheet. The amount of the lower Net Parental Child Support Obligation is subtracted from the higher amount.

The difference is the amount of child support the party having the higher obligation will pay to the party with the lower obligation.

GH. Residence with a Third Party

If the child is residing with a third party, the Court shall order each of the parties to pay to the third party their respective amounts of child support as determined by the worksheet.

I. Application of the Cost of Living Differential Adjustment

It is not intended that the Cost of Living Differential Adjustment be used if both parties live in the state of Kansas. It should only be used when one of the parties resides in another state.

Appendix IV provides instructions and an example for calculating the cost of living adjustment. The adjusted monthly income figure is entered on Line A.1. or Line B.1., as appropriate.

V. SPECIFIC INSTRUCTIONS FOR THE WORKSHEET

A. <u>Income Computation--Wage Earner</u> (Section A)

Section A of the worksheet determines the Domestic Gross Income for wage earners. Federal and state withholding taxes and Social Security are deducted within the Child Support Schedules. The amount of the Domestic Gross Income is entered on Line A.1. and also on Line C.1.

Worksheet Example: Parent B is a wage earner and has a Domestic Gross Income of \$832 per month.

B. <u>Income Computation--Self-Employed</u> (Section B)

Section B of the worksheet determines the Domestic Gross Income (Line B.3.) for self-employed persons. Reasonable Business Expenses (Line B.2.) will be deducted from the Self-Employment Gross Income (Line B.1.). The resulting amount on Line B.3. is also entered on Line C.1.

Worksheet Example: Parent A is self-employed and has a Self-Employment Gross Income of \$3,000 per month. Reasonable Business Expenses for Parent A are documented at \$1,232. Parent A's Domestic Gross Income is \$1,768 (\$3,000-\$1,232 = \$1,768).

C. Adjustments to Domestic Gross Income (Section C)

This section contains adjustments to Domestic Gross Income as determined for individuals who are wage earners in Section A or self-employed persons in Section B of the worksheet. The following adjustments to Domestic Gross Income may be appropriate in individual circumstances:

1. <u>Domestic Gross Income</u> (Line C.1.)

This amount is transferred from either Line A.1. or Line B.2. above.

2. <u>Court-Ordered Child Support Paid</u> (Line C.2.)

Pre-existing child support obligations in other cases shall be deducted to the extent that these support obligations are actually paid. These amounts are entered on Line C.2.

3. <u>Court-Ordered Maintenance Paid</u> (Line C.3.)

The amount of court-ordered maintenance paid pursuant to a court order in this or a prior divorce case shall be deducted to the extent that the maintenance is actually paid. This amount is entered on Line C.3.

4. <u>Court-Ordered Maintenance Received</u> (Line C.4.)

The amount of any court-ordered maintenance received by a party pursuant to a court order in this or a prior divorce case shall be added as income to the extent that the maintenance is actually received. This amount is entered on Line C.4.

5. Child Support Income (Line C.5.)

The result of the adjustments to the Domestic Gross Income is entered on Line C.5. of the worksheet and then transferred to Line D.1.

Worksheet Example: Neither Parent A nor Parent B has any adjustments to the Domestic Gross Income. Therefore, the Child Support Income for Parent A is \$1,768 and is \$832 for Parent B.

D. Computation of Child Support (Section D)

1. Child Support Income (Line D.1.)

The Child Support Income amount is transferred from Line C.5. The amounts for the Petitioner and the Respondent are added together for the Combined Child Support Income amount.

2. <u>Proportionate Shares of Combined Income</u> (Line D.2.)

To determine each parent's proportionate share of the Combined Child Support Income, each parent's Child Support Income is divided by the total of the Combined Child Support Income. These percentages are entered on Line D.2.

Worksheet Example: Parent A earns \$1,768 Child Support Income per month. Parent B earns \$832 Child Support Income

per month. Their Combined Child Support Income is \$2,600. Parent A's share of the Combined Child Support Income is \$1,768 divided by \$2,600 or 68%. The Parent B's share of the Combined Child Support Income is \$832 divided by \$2,600 or 32%.

3. <u>Basic Child Support Obligation</u> (Line D.3.)

The Basic Child Support Obligation is determined using the Child Support Schedules. The Child Support Schedules have three major components--the number of children in the family, the Combined Child Support Income, and the age of each child. The Child Support Schedule that corresponds to the total number of children for whom the parents share responsibility should be found. The appropriate Combined Child Support Income amount should be identified in the left-hand column. Using the appropriate age column for each child, the amount for each child should be identified. The amounts for each child should be added together to arrive at the total Basic Child Support Obligation. The total Basic Child Support Obligation is entered on Line D.3.

The following is a simple example for determining the basic support obligation on Line D.3. of the worksheet.

Worksheet Example 1: The parents above have two children, ages 6 years, 7 months and 3 years, 10 months. Using the "Two-Child Families" schedule, \$2,600 is found in the left-hand column. Under the first column for the four-year-old, \$258 \$252 is identified, and in the next column for the seven-year-old, \$303 \$293 is identified. These two amounts are added together to find the total Basic Child Support Obligation of \$561 \$545 per month.

The following are two Multiple-Family Adjustment examples for determining the basic support obligation on Line D.3, of the worksheet.

Example 2: The noncustodial parent with two children in the above example remarries and has a one-year-old child by the subsequent marriage. The Child Support Schedule for "Three-Child Families" should be used. At \$2,600 combined income of the parties, the amounts \$222 \$233 and \$260 \$270 are found and the sum of \$482 \$503 is entered on Line D.3.

Example 3: The noncustodial parent with two children in the above example remarries twice and has a one-year-old child by the second marriage and a two-month-old child by the third marriage. The Child Support Schedule for "Four-Child Families" should be used. At \$2,600 combined income of the parties, the amounts \$194 \$203 and \$227 \$235 are found and the sum of \$421 \$438 is entered on Line D.3.

The following are two Divided Custody examples for determining the basic support obligation on Line D.3. of the worksheet.

Example 4: The Petitioner in the above example has custody of the older child, six years and seven months. The Respondent has custody of the younger child, three years and ten months. The Child Support Schedule for "One-Child Families" should be used for calculating the support for each household. At \$2,600 combined income of the parties, the worksheet for the Petitioner to pay support to the Respondent would show \$323 \$325 at Line D.3. The worksheet for the Respondent's obligation for the older child would show \$378 \$377 at Line D.3. Without considering any other factors besides income in this example and after the remaining calculations are carried through, the Petitioner would pay the Respondent -\$220 \$221 for the younger child. The Respondent would pay the Petitioner \$121 for the older child. The net result is that the Petitioner would pay the Respondent \$99 \$100 per month.

Example 5: This second example depicts a combined

divided custody situation in which one of the parties has a subsequent child. Using the facts of Example 4 for this example, the Petitioner now has a subsequent child in addition to the older child of this support case. The Child Support Schedule for "Three-Child Families" should be used for calculating the support for each household. At \$2,600 combined income of the parties the worksheet for the Petitioner to pay support to the Respondent would show \$222 \$233 at Line D.3. The worksheet for the Respondent's obligation for the older child would show \$260 \$270 at Line D.3. After the remaining calculations are carried through, the Petitioner would pay the Respondent \$151 \$158 for the younger child. The Respondent would pay the Petitioner \$83 \$86 for the older child. The net result is that the Petitioner would pay the Respondent \$68 \$72 per month.

4. Health and Dental Insurance Premium (Line D.4.)

The increased cost to the parent for health, dental, or optometric insurance for the child is to be added to the Basic Child Support Obligation. If coverage is provided without cost to the parents, then zero should be entered as the amount. The cost of insurance coverage is entered in the column of the parent(s) providing it, and the total is entered on Line D.4.

Worksheet Example: Parent A has a single-coverage policy. To add the children would cost an additional \$125 a month. Therefore, \$125 would be entered in Parent A's column and as the total on Line D.4. of the Worksheet.

The court shall provide that all necessary medical expenses (including dental, orthodontic, optometric, etc.) which are not covered by insurance (including deductible) should be assessed to the parties in accordance with the parties' proportional share on Line D.2. of the worksheet.

5. Work-Related Child Care Costs (Line D.5.)

Actual, reasonable, and necessary child care costs incurred to permit employment or job search of a parent should be added to the support obligation. The monthly figure is the averaged annual amount, including variations for summer, adjusted using the table below. Projected child care expenses should be reduced by the anticipated tax credit for child care or child care reimbursement before an amount is entered on the worksheet.

- a. The annual Adjusted Gross Income, as defined by IRS, of the party incurring the child care costs should be used to determine the applicable percentage.
- b. The appropriate percentage should be applied to the monthly child care costs. The tax credit applies to actual child care expenditures up to \$200 per month for one child or \$400 per month for two or more children receiving child care. The table below lists the maximum allowable monthly child care credit.
- e. The result of applying the appropriate percentage to the child care costs (or the maximum allowable amount, whichever is less) is subtracted from the monthly child care costs to determine after tax monthly child care costs.
- c. In addition to the federal credit, determined above, a credit shall be applied based on the Kansas child care credit. This credit shall be applied by multiplying the federal credit calculated in subsection b. by 25% (.25).
- d. Both the federal credit (subsection b.) and the Kansas credit (subsection c.) are to be subtracted from the monthly child care costs to determine the net child care costs entered on Line D.5. of the worksheet.

Adjusted Gross Income ¹			Applicable Percentage ²	Maximum Monthly Credit One Child	Maximum Monthly Credit Two or More Children		
OV	ER	BUT NOT OVER					
\$	0	\$10,000	30%	\$60.00	\$120.00		
10	,000	12,000	29%	58.00	116.00		
12	,000	14,000	28%	56.00	112.00		
14	,000	16,000	27%	54.00	108.00		
16	,000	18,000	26%	52.00	104.00		
18	,000	20,000	25 %	50.00	100.00		
20	,000	22,000	24%	48.00	96.00		
22	,000	24,000	23%	46.00	92.00		
24	,000	26,000	22%	44.00	88.00		
26	,000	28,000	21%	42.00	84.00		
28	,000	No Limit	20%	40.00	80.00		

¹Adjusted Gross Income equals total annual income of the party incurring the child care costs less reimbursed employee business expense; deductible IRA, Keogh, and SEP contributions; self-employed health insurance deduction; penalty on early withdrawal of savings; and alimony paid to another party.

²Includes allowance for federal child care credits. This chart is based on instructions for the 1989 1993 tax year. The applicable percentages may vary from year to year. Current tax law should be consulted for the current applicable percentages.

Worksheet Example: Child care is needed for the preschool child. The cost of the child care is \$200 per month. Parent B pays for the costs of the child care and has an Adjusted Gross Income of \$7,980.

The applicable percentage for the federal child care credit is 30% from the above table. The percentage is applied to the monthly child care costs ($$200 \times .30 = 60). The result

of \$60 equals the maximum credit of \$60, in accordance with the above table. This amount is then multiplied by 25% to obtain a Kansas child care credit of \$15 (\$60 x .25 = \$15). As such, \$60\$ \$75 (\$60 + 15 = \$75) is subtracted from the monthly child care costs (\$200 - \$60\$ 75 = \$140\$ \$125). The result of \$140\$ \$125 would be entered in the parent's column and as the total on Line D.5. of the worksheet.

6. Parents' Total Child Support Obligation (Line D.6.)

The Parents' Total Child Support Obligation is the sum of the Basic Child Support Obligation (Line D.3.), the Health and Dental Insurance Premium (Line D.4.), and the Work-Related Child Care Costs (Line D.5.) and is entered on Line D.6.

Worksheet Example: The Parents' Total Child Support Obligation is obtained by adding the \$561 \$545 Basic Child Support Obligation (Line D.3.) plus \$125 in Health and Dental Insurance Premium (Line D.4.) and \$140 \$125 in Work-Related Child Care Costs (Line D.5.). The Parents' Total Child Support Obligation is \$826 \$795 per month.

7. Parental Child Support Obligation (Line D.7.)

The support obligation for each parent is determined by multiplying each parent's proportionate share shown on Line D.2. times the Parent's Total Support Obligation (Line D.6.). The result is entered on Line D.7.

Worksheet Example: On Line D.2., Parent A had 68% of the Combined Child Support Income and Parent B had 32%. Therefore, Parent A's obligation is \$\\$562 \\$541 (.68 x \\$826 \\$795). Parent B's obligation is \$\\$264-\\$254 (.32 x \\$826 \\$795).

8. Adjustment for Health and Dental Insurance Premiums and Work-Related Child Care Costs (Line D.8.)

If costs of Health and Dental Insurance Premiums and/or Work-Related Child Care Costs are included in the total child support obligation, the parent actually making the payment is credited. The amount paid is entered in the column of the parent(s) providing the payment on Line D.8.

Worksheet Example: Parent A pays \$125 per month for health insurance. Therefore, \$125 should be subtracted from Parent A's child support obligation of \$562 \$541 to make a net obligation of \$437 \$416. Parent B pays \$140 \$125 per month child care costs. Therefore, \$140 \$125 should be subtracted from that parent's child support obligation of \$264 \$254 to make a net obligation of \$124 \$129.

9. Net Parental Child Support Obligation (Line D.9.)

The Net Parental Child Support Obligation is the Parental Child Support Obligation (Line D.7.) minus the Adjustment for Health and Dental Insurance Premiums and Work-Related Child Care Costs (Line D.8.) and is entered on Line D.9. The custodial parent retains his/her portion of the net obligation. The noncustodial parent's net obligation becomes the rebuttable presumption amount of the support order.

Worksheet Example: Parent B has primary residential custody. Therefore, Parent A will pay \$437 \$416. Parent B will retain the \$124 \$129 which represents his/her share.

E <u>Child Support Adjustments</u> (Section E)

The fifth part of the worksheet is the list of Child Support Adjustments. The Court must document whether a particular item was eensidered or was not applicable for the particular case. Child Support Adjustments may be allowed as either additions or subtractions. The party requesting the adjustment is responsible for proving the basis for the adjustment. For every Child Support

Adjustment, it should be noted on the worksheet whether the each adjustment was considered or is not applicable to the particular case. If the adjustment is considered applicable, the amount considered should be noted on the appropriate line in Section E. After all applicable Child Support Adjustments have been noted on the worksheet by the Court, the amounts should be totaled.

1. <u>Long-Distance Visitation Costs</u> (Line E.1.)

Any substantial and reasonable long-distance transportation/ communication costs directly associated with visitation shall be considered by the Court. The amount considered should be entered on Line E.1.

2. <u>Time Spent with Noncustodial Parent</u> Visitation Adjustment (Line E.2.)

The Court may consider giving failure of a noncustodial parent to exercise visitation rights or give credit for the time spent with the noncustodial parent, and when the time spent with the noncustodial parent exceeds thirty percent (30%) of the child's time or when the noncustodial parent has the child for a single block of time (including custodial parent's visitation) in excess of thirty days, the Court shall consider the increased costs to the noncustodial parent and the savings to the custodial parent and may adjust the child support accordingly.

In instances when a child spends in excess of thirty (30) consecutive days with the noncustodial parent, the Court shall determine whether an adjustment in child support is appropriate, giving consideration to the fixed obligations of the custodial parent which are attributable to the child and to the increased cost to the noncustodial parent attributable to the child's visit. Any reduction shall not leave the custodial parent with less than 33% of the Combined Total Child Support Obligation (Line D.6.).

The amount considered should be entered on Line E.2.

3. <u>Income Tax Exemption Considerations</u> (Line E.3.)

If the parties share or alternate the income tax exemption, this section should not be utilized. If the custodial parent cleets not to share or alternate the income tax exemption for the minor child by executing IRS Form 8332, the Court then shall consider the effect of the failure to share the exemption on the noncusotdial parent's monthly Child Support Income and may adjust the child support accordingly.

If the parties agree to share the economic benefits of the income tax exemption for a minor child, this section shall not be used. If the parties are unable to agree to share or alternate the exemption or, after agreeing the custodial parent refuses to execute IRS Form 8332, the court shall consider the economic effect to both parties and may adjust the child support. The court may also consider any other tax impacts. (Appendix VI).

Generally, the parent with the higher income will benefit more from the tax exemption. The parties should be encouraged to maximize the tax benefits and adjust the child support equitably.

The party requesting the alternation or sharing of the exemption shall have the burden of proving the effect of the alternation or sharing. The amount considered should be entered on Line E.3.

NOTE: In 1990, the federal income tax exemption is \$2,050 per person for those unmarried persons having incomes less than \$109,100. Since exemptions reduce taxable income, the value of the exemption to the noncustodial parent may be calculated by multiplying the highest marginal federal tax and

marginal state tax bracket of the noneustodial parent times (for 1990 taxes) \$2,050. This amount should be divided by 12 to arrive at the monthly amount. The amount of the tax exemption will change. Current tax law should be consulted for the current exemption amount.

Example: A noncustodial parent has one minor child and has an Annual Adjusted Gross Income of \$15,750, which puts the noncustodial parent in a 15% marginal federal income tax rate, and a 5.15% marginal Kansas income tax rate.

Accordingly, if the custodial parent will not alternate the exemption, the calculation for the value of the exemption would be \$2,050 x both 15% and 5.15% for a total value of \$413.08. That figure should then be divided by 12 to arrive at the monthly value of \$34.42, which should then be divided by two because the Guidelines contemplate that the noncustodial parent would only have been able to declare the exemption every other year, producing a final adjustment to the guideline child support of a monthly credit of \$17.21 to the noncustodial parent.

4. Special Needs (Line E.4.)

Special needs of the child are items which are more than the usual and ordinary expenses incurred, such as ongoing treatment for health problems, orthodontist care, special education, or therapy costs which are not considered elsewhere in the support order or in computations on the worksheet. The amount considered should be entered on Line E.4.

The court shall provide that all necessary medical expenses (including dental, orthodontic, cosmetic surgery, optometric) which are not covered by insurance (including deductible) should be assessed to the parties in accordance with the parties proportional share on Line D.2. of the Worksheet.

5. Agreement to Support Children Past Minority (Line E.5.)

The fact that a party is currently supporting a child of the parties in college (or past the age of majority) may be considered in the event that the primary residential custodian seeks to increase the child support for the benefit of any children still under the age of eighteen. The amount considered should be entered on Line E.5.

6. Cost of Living Differential (Line E.6.)

The cost of living in different geographic regions of the United States may be considered by the Court. The amount considered should be entered on Line E.6.

8.6. Overall Financial Conditions of the Parties (Line E.86.)

The financial situation of the parties may be reason to deviate from the calculated Net Parental Child Support Obligation if the deviation is in the best interests of the child. If, for example, either party has more than one job, the circumstances requiring the additional employment should be considered. If the additional employment was historically relied upon by the parties prior to the dissolution of the relationship, then all of the income should be included in the calculation of the child support obligation. However, if the additional employment was secured after the dissolution of the relationship in an effort to meet additional financial responsibilities, consideration should be given to that circumstance, provided that the Court shall keep in mind the best interest of the child. In such a situation, two worksheets can be prepared with one worksheet including all income and the other worksheet including only the primary employment to determine the margin for deviation. amount considered should be entered on Line E.86.

7. Residence with Third Party (Line E.7.)

When a child resides with a third party, the Court may apportion support between the parents and have it paid to the third party. The amount considered should be entered on Line E.7.

9.7. Total (Line E.97.)

The Total of all Child Support Adjustments should be entered on Line E.97. The Total(s) specified on this line should be transferred to Line F.2. below.

Worksheet Example: Neither Parent A nor Parent B is claiming any Child Support Adjustments. Therefore, the Total for each parent is zero.

F. <u>Deviation(s) From Rebuttable Presumption Amount</u> (Section F)

The final part of the worksheet shows the adjustment, if any, to the Net Parental Child Support Obligation based on consideration of the Child Support Adjustments.

1. Net Parental Child Support Obligation (Line F.1.)

The amount from Line D.9. above is transferred to Line F.1.

2. <u>Total Child Support Adjustments</u> (Line F.2.)

The amount from Line E.97. above is transferred to Line F.2.

3. Adjusted Child Support Obligation (Line F.3.)

The Total Child Support Adjustments is added or subtracted, as appropriate, from the Net Parental Child Support Obligation. The resulting amount is entered on Line F.3. and becomes the amount of the child support order.

Worksheet Example: No Child Support Adjustments were considered for either party. The Adjusted Child Support Obligation for Parent A is \$477 \$416 and \$84 \$129 for Parent B.

VI. CHANGES OF CIRCUMSTANCE

Courts have continuing jurisdiction to modify child support orders to advance the welfare of the child when there is a material change in circumstance. In addition to changes of circumstance, which have traditionally been considered by courts, any of the following constitute a material change of circumstance to warrant judicial review of existing support orders:

A. Change in financial circumstances of the parents or the guidelines which would increase or decrease by 10% or more the Net Parental Child Support Obligation shown on Line +0 D.9. of the worksheet.

An increase in the custodial parent's gross income is not a material change of circumstance for the purpose of increasing the child support obligation.

A parent shall notify the other parent of any change in financial circumstances including but not necessarily limited to income, work-related child care costs, and health insurance premiums which change could constitute a material change of circumstances.

Upon receipt of written request for financial information a parent shall have thirty days within which to provide the requested information in writing to the other parent. Refusal to provide the requested information may make the noncomplying parent responsible for the costs and expenses including attorney fees incurred in obtaining the requested information.

B. The 7th and 16th birthdays of the child.

- C. Emancipation of a child.
- D. Failure to comply with the terms of a positive or negative adjustment to the Net Parental Child Support Obligation awarded by the Court, such as failure to exercise visitation rights or non-utilization of a special needs allocation for private schooling.

VII. REVIEW OF GUIDELINES

Public Law 100-485 requires that the state guidelines for child support must be "reviewed at least every four years to ensure that their application results in the determination of appropriate child support amounts." Therefore, these Kansas guidelines shall be reviewed by the Child Support Guidelines Advisory Committee no later than October 1, 1993 1997, and at least once every four years thereafter.

Endnotes

1. The original child support guidelines, promulgated pursuant to K.S.A. 20-165 by the Supreme Court on October 1, 1987, were proposed by the Kansas Commission on Child Support following a two-year study. See Kansas Commission on Child Support, "Proposed Kansas Child Support Guidelines," 1987 (available in Kansas Law Library, Topeka, Kansas). The report includes a detailed background discussion, including the policy criteria upon which the original guidelines were based.

The Child Support Guidelines Advisory Committee was initially appointed by the Supreme Court on April 7, 1989, to review the implementation of the statewide child support guidelines, solicit public input regarding the guidelines, and make recommendations to address the new federal mandates of the Family Support Act of 1988. The committee was convened again in 1993 to conduct a comprehensive review of the guidelines and to update the economic data. The current Advisory Committee's members are:

*Hon. Herbert W. Walton (Chairman), Olathe Administrative Judge, Retired, 10th Judicial District

Allen B. Angst, Abilene Attorney, Shared custodial parent

John Bird, Hays Attorney

Roy F. Brungardt, Hays Certified Public Accountant

*Linda Elrod, Topeka Professor of Law, Washburn University

Jackie Fletcher, Kansas City United Way

Hon. Thomas H. Graber, Wellington District Judge, 30th Judicial District

Charles F. Harris, Wichita Attorney

Dave Kerr, Hutchinson State Senator, 34th District

Sherri E. Loveland, Lawrence Attorney

*Nancy K. Meacham, Wichita Attorney, Custodial parent

Hon. Paul E. Miller, Manhattan District Judge, 21st Judicial District

Thomas C. Owens, Overland Park

Attorney

*Larry Rute, Topeka Kansas Legal Services, Inc.

*Joan Wagnon, Topeka State Representative, 55th District

*Members of the original Kansas Commission on Child Support, appointed in December, 1984 by then-Governor John Carlin.

- 2. See Elrod, "Kansas Child Support Guidelines: An Elusive Search for Fairness in Support Orders," 27 Washburn L. J. 104, 120-25 (1987). Expenditures per child are assumed to increase with increases in parents' combined income, decrease as the total number of children in the family increases, and increase as the child grows older.
- 3. William T. Terrell, Ph.D., is an Associate Professor of Economics at Wichita State University, Wichita, Kansas. For an explanation of Dr. Terrell's economic model, see Terrell, "Expenditures on Children for Child Support: Economist as Policy Advisor" (paper presented to the Eastern Economic Association at Baltimore, Maryland, March, 1989) (available in Kansas Law Library, Topeka, Kansas). See also Kansas Commission on Child Support, supra note 1, at 13-15.
- 4. Ann Coulson, Ph.D., is an Assistant Professor in the Department of Human Development and Family Studies, Kansas State University, Manhattan, Kansas. The following sources were used to update the model: U.S. Bureau of Labor Statistics, "Consumer Expenditure Survey Series: Interview Survey, 1986-87" (1989); U.S. Bureau of the Census, Current Population Reports, Household After-Tax Income: 1986, ser. P-23, No. 157 (1989); U.S. Department of Agriculture, Agricultural Research Service, "Updated Estimates of the Cost of Raising a Child," Family Economics Review, No. 2 (May 1989). See Letter from Dr. Ann Coulson to Hon. Herbert Walton, February 21, 1990, at 1, 3 (available in Kansas Law Library, Topeka, Kansas).

Adjustments were made to the national expenditure data to avoid double-counting certain expenditures, such as health care, health insurance, and child care services. Because social security was considered as a tax, in the initial stage of the development of the schedule, the category of social security and pension plan contributions was also excluded so that the expenditure would not be counted twice. Additionally, the Committee excluded a number of expenditures considered to be discretionary or not attributable to children. Expenditures thus excluded were for alcoholic beverages, tobacco, vacation homes, boarding costs for children away at school, and cash contributions.

- 5. See the Child Support Guidelines Committee Report dated November 1993. Ann Coulson, Ph.D. prepared a description of the derivation of the 1993 child support schedules.
- 5.6: See Terrell, supra note 3, at 7; Letter from Dr. Ann Coulson to Hon. Herbert Walton, February 21, 1990, supra note 4, at 2.
- 6.7. See Terrell, supra note 3, at 15-18; see also Kansas Commission on Child Support, supra note 1, at 15; Letter from Dr. Ann Coulson to Hon. Herbert Walton, February 21, 1990, supra note 4, at 3.

Attachment I: Child Support Worksheet has been removed.

Current Forms are available at http://www.kansasjudicialcouncil.org/home.shtml

OTE: Appendix II, Child Support Schedules, is amended in its entirety effective August 1994. The schedules herein supersede the Child Support Schedules which were attached to Administrative Order No. 83.

To determine child support at higher income levels:

Age 16-18: Income^{0.697739} X 2.341021

Age 7-15: Determine child support for Age 16-18 and then multiply by 0.87

Age 0-6: Determine child support for Age 16-18 and then multiply by 0.75

Current Forms are available at http://www.kansasjudicialcouncil.org/home.shtml

Cost of Living Differential

To adjust for differences in costs of living in various locations around the country, use the following method.

Use the <u>ACCRA Cost of Living Index</u> which is available through many public libraries or local Chamber of Commerce offices. This index is published quarterly and gives relative costs of living for communities throughout the United States. Because there are no state costs, it is necessary to obtain an average state cost by adding costs for every listed city in the state and dividing by the number of cities. For instance, the average published costs for communities in Kansas in the <u>ACCRA Cost of Living Index</u>, Vol. 26, No. 1 for the first quarter in 1993 are:

Lawrence	93.3
Garden City	91.7
Manhattan	91.2
Salina	92.7
Kansas City ¹	97.5.

The sum of these costs is 466.4. When divided by 5 (the number of cities), the average cost for Kansas is 93.28.

If a parent, custodial or noncustodial, moves to another state, calculate the Cost of Living Differential as follows:

$$CLD = \frac{KS - NS}{NS} \times MI$$

 \underline{CLD} is the Cost of Living Differential, \underline{MI} is the monthly income at the new location, \underline{KS} is the Kansas average cost, and \underline{NS} is the new state average cost.

The Cost of Living Differential should be used to adjust Domestic Gross Income in Part C. of the Child Support Worksheet.

Example 1

For instance, if a parent moves to Alaska, the 1993 average cost for Alaska is \$138.52.2 If the parent earns \$3000 per month in Alaska, the Cost of Living Differential is:

$$CLD = \frac{93.28 - 138.52}{138.52} \times 3000$$
$$= \frac{-45.24}{138.52} \times 3000$$
$$= -0.3266 \times 3000$$
$$= -979.79$$

The parent's income of \$3000 is reduced by the \$979.79 adjustment. The net amount \$2,020 is entered on Line A.1. or Line B.1., as appropriate.

Example 2

If a parent moves to Arkansas and earns \$3000 per month, the average cost for Arkansas is \$91.06.3 The Cost of Living Differential is:

$$CLD = \frac{93.28 - 91.06}{91.06} \times 3000$$
$$= \frac{2.22}{91.06} \times 3000$$
$$= 0.0244 \times 3000$$
$$= 73.14$$

The parent's income of \$3000 is increased by the \$73.14 adjustment. The net amount of \$3073 is entered on Line A.1. or Line B.1., as appropriate.

¹Kansas City, Kansas costs are listed under Missouri.

²Determined by adding costs of listed Alaska cities in the <u>ACCRA Cost of Living Index</u>, Vol. 26, No. 1 and dividing by the number of listed cities.

³Determined by adding published costs of Arkansas cities in the <u>ACCRA Cost of Living Index</u>, Vol. 26, No. 1 and dividing by the number of listed cities.

Appendix VI

Income Tax Considerations

Dependent's Exemption:

If the parties share or alternate the income tax exemption, this appendix should not be used. If the custodial parent elects not to share or alternate the income tax exemption for the minor child by executing IRS Form 8332, the Court then shall consider the effect of the failure to share the exemption on the noncustodial parent's monthly Child Support Income and may adjust child support accordingly.

Generally, the parent with the higher income will benefit more from the tax exemption. The parties should be encouraged to maximize tax benefits and adjust child support equitably.

The party requesting the alternation or sharing of the exemption shall have the burden of proving the effect of the alternation or sharing. The amount considered should be entered on Line E.3.

NOTE: For 1993, the federal income tax exemption is \$2,350 per person for those unmarried persons having incomes less than \$108,450, and the Kansas exemption is \$2,000. Since exemptions reduce taxable income, the value of the exemption to the noncustodial parent may be calculated by multiplying the applicable exemption amount by the noncustodial parent's applicable highest marginal rate at both the federal and Kansas levels. The combined federal and Kansas amount should be divided by 12 to arrive at the monthly amount.

Example: A noncustodial parent has one minor child and has an Adjusted Gross Income in 1993 of \$15,750, which puts the noncustodial parent in a 15% marginal federal income tax rate and a 4.4% Kansas marginal income tax rate. Accordingly, if the custodial parent will not alternate the exemption, the calculation for the value of the exemption would be calculated as \$2,350 X .15 for the federal amount and \$2,000 X .044 for the Kansas rate. The resulting total, \$440, would be divided by 12 to arrive at the monthly value of \$37, which should then be divided by two because the guidelines contemplate that the noncustodial parent would only have been able to declare the exemption every other year, producing an adjustment to the guideline child support of a monthly credit of \$18 to the noncustodial parent.

Head of Household Adjustment:

If the custodial parent utilizes the standard deduction and files as head of household, a tax benefit results to the custodial parent that, absent custody of the child, might not otherwise be available. Such tax benefit received by the custodial parent can be measured by the difference in the standard deduction for head of household over the standard deduction for a single taxpayer multiplied by the applicable marginal federal and state income tax rates. In addition, the custodial parent is given an additional exemption at the Kansas level due to filing as a head of household. The benefit of the additional exemption is calculated by multiplying the custodial parent's marginal Kansas

income tax rate by the Kansas exemption amount. The total of the standard deduction and additional exemption benefits should be divided by 12 to arrive at the monthly amount. This amount would be credited against the monthly child support otherwise paid by the noncustodial parent.

Example: A custodial parent has one minor child and has an Adjusted Gross income in 1993 of \$15,750, which puts the custodial parent in a 15% marginal federal income tax rate and a 4.4% marginal Kansas income tax rate. The custodial parent does not itemize. The difference in the Federal standard deduction for head of household over that for a single taxpayer is \$1,700 (\$5,400 - 3,700 + \$1,700). This difference multiplied by the custodial parent's federal marginal income tax rate of 15% result in an income tax benefit of \$255. This difference in the Kansas standard deduction for head of household over that for a single taxpayer is \$1,400 (\$4,400 - 3,000 = \$1,400). This difference multiplied by the custodial parent's marginal Kansas income tax rate of 4.4% results in a benefit of \$62, for a combined federal and Kansas standard deduction benefit of \$317. Because the custodial parent filed as head of household, the parent was allowed an additional Kansas exemption of \$2,000, for an income tax benefit of \$88 (\$2,000 X .044 = \$88). The total income tax benefit for filing as head of household is thus \$405. This amount is divided by 12 to arrive at a monthly credit of \$34.

Earned Income Credit Adjustment:

The custodial parent may also receive a refundable income tax credit due to the custody of the child, if the parent meets the requirements to claim an earned income credit. The earned income credit is a three-part calculation with a separate credit calculated in relation to the taxpayer's earned income level, health insurance paid for qualifying children, and extra credit if a child was born in the tax year in which the tax return is filed. IRS Publication 596 provides tables and instructions for calculating the credit. The total credit received should be divided by 12 to arrive at the monthly amount. Such amount should reduce the monthly child support payment.

Example: A custodial parent with one minor child meets all the requirements necessary to claim an earned income credit. The parent has an Adjusted Gross Income in 1993 of \$15,750, all of which is earned income, and the health and extra credits do not apply to the parent. Based on the Table for the earned income credit, the credit is \$898, resulting in a monthly credit of \$75.

The combined benefits for exemption, head of household, and earned income credit should be combined with any other pertinent income tax considerations and entered on Line E.3.

Example: Given the above-listed examples pertain to the same custody case, the monthly child support payment would be reduced by \$127, by entering the amount on Line E.3. as a positive adjustment for the custodial parent and as a negative adjustment for the noncustodial parent.

NOTE: The above-listed guidelines reflect tax law for 1993. Amounts of exemptions, deductions, and credits, as well as tax law itself will change. Current tax law should be consulted for implementation of and relevance to these guidelines.

Additional Information:

The following is a summary of the pertinent income tax attributes for 1993, prior to any tax legislation during the year:

	<u>Federal</u>	<u>Kansas</u>
Dependent Exemption Additional for Head of Household	\$2,350 -	\$2,000 2,000
Standard Deduction		
Single	3,700	3,000
Head of Household	5,400	4,400
Maximum Earned Income Credit		
Basic (One Child)	1,434	_
Basic (Two or More)	1,511	_
Health Insurance Credit	465	-
Additional Credit for Child born in		
1993	388	
Maximum Tax Brackets	31%	7.75%

NOTE: The recently enacted Revenue Reconciliation Bill for 1993 has expanded and simplified the federal earned income tax credit provisions. The maximum earned income tax credits for 1994 is \$2,038 (one child) and \$2,527 (two or more children). The credit amounts are increased for 1995 and thereafter. The bill has apparently repealed the supplemental health insurance and young child (newly born) credits effective in 1994.
